

Setting Print Volume Use Limitations (Device Settings)

- Log in as **Admin**
- Select **Device Management \ Configuration**
- Select **User Authentication Management**

The screenshot shows a dialog box titled "User Authentication Management". At the top, there are two buttons: "OK" and "Cancel". Below the buttons, there is a label "User Authentication Management :" followed by a dropdown menu that currently displays "User Code".

Set **User Authentication Management** to **User Code**
Scroll down the page to make additional settings

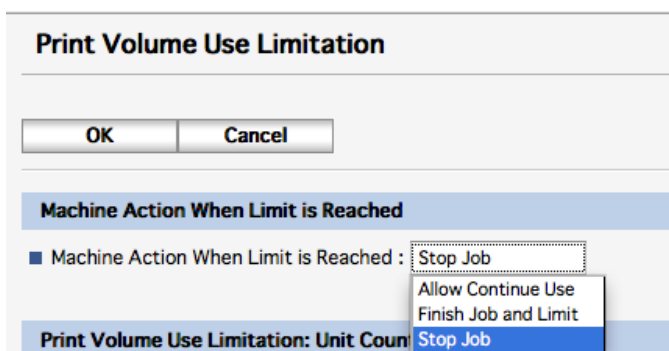

The screenshot shows a dialog box titled "User Code Authentication Settings". Under the heading "Functions to Restrict", there are four rows of settings:

- Copier** : Black & White Single Color Two-color Full Color
- Printer** : Black & White Color PC Control
- Other Function(s)** : Document Server Fax Scanner Browser
- Extended Features** : AutoStore

Place a **check** in all of the functions that you want to restrict and click **OK**

- Select **Print Volume Use Limitation**

The screenshot shows a dialog box titled "Print Volume Use Limitation". At the top, there are two buttons: "OK" and "Cancel". Below the buttons, there is a section titled "Machine Action When Limit is Reached". Under this section, there is a label "Machine Action When Limit is Reached :" followed by a dropdown menu. The dropdown menu is open, showing four options: "Stop Job", "Allow Continue Use", "Finish Job and Limit", and "Stop Job". The "Stop Job" option at the bottom is highlighted in blue. Below the dropdown, there is a label "Print Volume Use Limitation: Unit Coun" followed by a text input field.

Set **Machine Action When Limit is Reached** to **Stop Job**

Print Volume Use Limitation: Unit Count Setting

■ Copier

Color : (0-200)

Black & White : (0-200)

■ Printer

Color : (0-200)

Black & White : (0-200)

Each user will be assigned a number of units when they are set up in the Address Book. The settings here allow you to set the value of the units for color and B&W. For example, if the user was assigned 500 units and walked up to the MFP and made 40 color copies, they would have 100 units left (40 color copies X 10 = 400). The device used in this example is an A4 device. An A3 device would have additional settings for A3/DLT (11x17). An 11x17 print has double the cost of an 8.5 x 11 print. Appropriate settings for Color A3/DLT would be 20 and for B&W A3/DLT would be 2.

Use these settings to specify when the Print Volume Use Limitation will be reset. After making settings, click Apply Settings
Click OK

The device settings are now complete

Setting Print Volume Use Limitations (Address Book Settings)

- Select **Home**
- Select **Device Management / Address Book**

Address List (Display All Items)

With Easy Input you can edit the Address Book with a wizard method but you cannot edit all items.
With Detail Input you can edit all items.

Select **Detail Input**, then **Add User**.

To modify an existing user, select the **User** and select **Change**

Add User

■ Registration No. : 00013

■ Name : Drew Brees

■ Key Display : Drew Brees

■ Display Priority : Priority5 1: High Priority - 10: Low Priority

Title

■ Title 1 : CD

■ Title 2 : None

■ Title 3 : None

■ Add to Freq. : On Off

Add the **User Name** and **Key Display**

Set **Title 1** to initial group

Set **Add to Frequent** to either **On** or **Off**

Volume Use Counter: Scheduled/Specified Reset Settings

Volume Use Counter: Scheduled/Specified Reset Settings : Specify Cycle

Reset Date : 1 (day)

Cycle (Day) : 120 (day basis)

Specified Reset Date : 8 month 31 day 2014 year

Reset Time : AM 12 :00

Next Reset Date : Dec 29,2014 12:00 AM Apply Settings

OK Cancel

Volume Use Counter: Scheduled/Specified Reset Settings: Options are:

Off (does not reset automatically)

Specify Date (the counter will reset on a specific date)

Specify Cycle (the counter will reset after so many days, you can input anything between 1~180 in this field)

Every Month (the counter will reset at the beginning of every month)

It is your choice here as to how you wish to manage the Counter Reset on this device

In the example above, we selected **Specify Cycle** and set the Cycle (Day) to **120** days. We then input the Specified Reset Date as the date that the semester began (**08/31/2014**). When we click Apply Settings, the machine tells us when the Next Reset Date will be (**Dec. 29, 2014 12:00 AM**). On December 29th, 2014 the counter will reset and the Next Reset Date field will automatically advance 120 days.

We've now completed programming the device and can now add our student users to the Address Book and set their limits. In our example, students are given \$25.00 per semester for printing. The institution charges students 0.02 per B&W copy or print and 0.10 per color copy or print.

$$\$25.00 / .02 = 1,250$$

Print Volume Use	
■ Print Volume Use Limitation :	<input checked="" type="radio"/> On <input type="radio"/> Off
Limit Value	: 1250
■ Volume Used	: 0 <input type="button" value="Clear"/>
■ Previous Volume Used	: ---
■ Last Reset Date	: --- --, --- --: ---

In the Print Volume Use for the student user, set the Limit Value to **1250** and apply all of your settings by clicking OK.

Notice that here you can see:

Volume Used (**Clear** will apply a reset to the User Volume)

Previous Volume Used

Last Reset Date

With the settings above, the student can make 1,250 B&W copies or prints.

They can make 125 color copies or prints.

They can make any combination of B&W or Color not to exceed the \$25.00 in total value that has been assigned.

General Notes:

Based on \$25.00 per semester...

If the institution is charging 0.01 per B&W page, you would input 2500

If the institution is charging 0.02 per B&W page, you would input 1250

If the institution is charging 0.03 per B&W page, you would input 833

If the institution is charging 0.04 per B&W page, you would input 625

If the institution is charging 0.05 per B&W page, you would input 500

Print Volume Use

■ Last Reset Date

:---,---:---

Our user has just made 10 B&W copies and 10 Color copies and it shows his volume used as 120. This volume used is correct based upon our settings in the Print Volume Use Limitation Unit Count Setting field:

10 B&W copies x 2 units = 20

10 Color copies x 10 units =100
