Introduction

The Physical Facilities Inventory and Survey (PFIS) is a web based system for tracking and analyzing buildings and their condition.

The Inventory system tracks space at the Institution, Campus, Building, Floor and Room levels. The Inventory is primarily concerned with owned facilities and market rate leased facilities. The Postsecondary Education Facilities Inventory and Classification Manual (FICM): 2006 Edition (http://nces.ed.gov/pubs2006/2006160.pdf) is used for the inventory and classification of space.

The Survey system documents the current condition of buildings in a uniform format and with a consistent rating system. There are two ratings: the first is performed by the institution and the second is a review verification. The Survey is based on the CSI UniFormat.

System Access

The PFIS website can be accessed at http://pfis.tbr.edu.

The system uses Windows Authentication and will require a username and password. You will be prompted for your credentials when you try to access the website. For Google Chrome or Mozilla Firefox users, you may enter your username. For Internet Explorer users, you will need to include the TBR-FAC-APP-01 domain (e.g., TBR-FAC-APP-01\Username). The domain name ends with number-zero number-one.

There is no logoff or signoff. Just close the browser when you are done.

The guest account credentials for accessing the system may be requested by sending an email to alan.gosart@tbr.edu.
General Information

Most pages consist of two panes: the menu pane on the left and a data pane on the right. Some pages have three panes: a navigation pane between the menu pane and the data pane. And some pages have four panes, with the middle pane split in two: the navigation pane above the section pane. The menu pane, the navigation pane, and the section pane are resizable and collapsible (useful when viewing with a smaller screen). Here is a sample of the menu pane.

![Menu Pane](image)

*Figure 1 - Menu Pane*
Physical Facilities Inventory

The Inventory section has several options for entering and viewing data. A brief description for each follows.

Data Entry

The Data Entry screen has three panes: a menu pane, a navigation pane, and a data pane. The navigation pane functions like Windows Explorer with folders. Clicking on the chevron to the left of an item will expand (or contract) the item. Clicking on the item will display a grid of the item’s elements (e.g., selecting a campus will open a grid with its buildings). Each grid displays a title showing what it contains, buttons to add elements or export the grid, and the data for each element. Each row of the grid contains a hot-link to edit or delete the element. Here is a sample of the navigation pane.

![Figure 2- Data Entry Navigation Pane](image)

View Buildings

The View Buildings screen displays a grid with all the buildings for all the institutions the user has access to. Each row of the grid contains a hot-link to edit or delete the building.

View Rooms

The View Rooms screen brings up a Building Selector dropdown list and a button to export all rooms to Excel. Selecting a building will display a grid with all the rooms for that building. Each row of the grid contains a hot-link to edit or delete the room. The Export All My Rooms to Excel button will export all rooms for all institutions the user has access to. Since this may be a very large data set, it cannot be displayed.

Building Edit Checks

The Building Edit Checks screen displays a grid showing any buildings which have one or more items in question. Each row of the grid contains a hot-link to edit the building.
Room Edit Checks
The Room Edit Checks screen displays a grid showing any rooms which have one or more items in question. Each row of the grid contains a hot-link to edit the room.

View Building Areas
The View Building Areas screen displays a grid showing all the area data for each building. The Net Area cell may be pink (Net Area exceeds Gross Area) or tan (Net Area equals Gross Area). The Unclassified Area cell will be tan if the value is non-zero. Any colored cells should be reviewed for possible correction to improve the accuracy of the data.

Schedule D
The Schedule D screen displays the Schedule D information. The current year data (Gross SqFt, Aux/Rev SqFt, and E&G SqFt) is pulled from the Schedule D Archive.

Schedule D Summary
The Schedule D Summary screen displays the summary information for Schedule D, ready for export.

Schedule D Archives
The Schedule D Archives screen brings up an Archive Selector dropdown list. Selecting an archive will display it in the grid.

Institution SF / FTE
The Institution SF / FTE screen brings up a Type Selector for My Institutions, Universities, or Colleges. Selecting one will display a chart showing the results. Interesting fact: clicking on an item in the legend will add or remove it from the chart.

Campus SF / FTE
The Campus SF / FTE screen displays a chart showing the results for the campuses in the user’s institutions. Interesting fact: clicking on an item in the legend will add or remove it from the chart.

Enrollment
The Enrollment screen brings up a Type Selector for Institution Enrollment or Institution and Campus Enrollment. Selecting one will display the enrollment data.

Reference Tables
Reference Tables expands to show a list of reference tables which include CIP Codes, Program Classifications, and Room Use Codes. Selecting a table will display its contents which may be exported.
Physical Facilities Survey

The Survey section has two options for entering and viewing data: View Surveys and Reports.

**View Surveys**

The View Surveys screen has four panes: a menu pane, a navigation pane, a section pane, and a data pane. The navigation pane functions like Windows Explorer with folders. Clicking on the chevron to the left of an institution or campus will expand (or contract) the item. Clicking on a building will display the currently active section for the building (the Building Summary is the default active section). The navigation pane also contains Previous Building and Next Building buttons which can be used to go to same section of the previous/next building. The section pane is a selector for the various survey sections. Selecting an item will display the survey details for that item in the data pane. The section pane also contains Previous Section and Next Section buttons which can be used to scroll to the previous/next section of the current building. The data pane displays the selected section’s data for the current building. Here are samples of the navigation pane and the section pane.

![Figure 3 - View Surveys Navigation Pane](image1)

![Figure 4 - View Surveys Section Pane](image2)
The rating sections of the survey contain Rating, Items, Description, and Condition / Recommendation fields. Since the survey is a deficiency survey, the default rating is 100%. Any lower rating should be explained in the Condition / Recommendation field. The following table shows the values and definitions for the ratings.

<table>
<thead>
<tr>
<th>Rating</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>100%</td>
<td>The “basis rating” if no deficiencies exist</td>
</tr>
<tr>
<td>90%</td>
<td>Minor repair work is required, probably campus maintenance</td>
</tr>
<tr>
<td>80%</td>
<td>Repair work required, possibly requiring engineering</td>
</tr>
<tr>
<td>70%</td>
<td>Upgrade required, replacement of components</td>
</tr>
<tr>
<td>60%</td>
<td>System salvageable, major upgrade or significant replacement of components required</td>
</tr>
<tr>
<td>50%</td>
<td>Partially functions, but ineffective / inappropriate – needs mid-term (5 – 10 years) replacement</td>
</tr>
<tr>
<td>40%</td>
<td>Limited function / reliability and replacement required</td>
</tr>
<tr>
<td>30%</td>
<td>Low function, serious code / safety problems and replacement required</td>
</tr>
<tr>
<td>20%</td>
<td>Barely functioning, causing other damage, near-term replacement required</td>
</tr>
<tr>
<td>10%</td>
<td>Failed system, immediate replacement needed</td>
</tr>
<tr>
<td>0%</td>
<td>Does not exist but is required, totally failed causing serious damage</td>
</tr>
</tbody>
</table>

The Items are system specific components and may be rated from Satisfactory to Unsatisfactory (S, 2, 3, 4, U). The Description field should contain a brief specific description of the item(s) or system(s). The Condition / Recommendation field should contain the condition comments and provide recommendations for corrections.

The Roofing section has an additional Roof Information grid where roof details may be entered and the roof warranty may be uploaded.

The Rating Summary screen displays a grid of the survey sections and the ratings and scores.

The Attachments screen displays a grid of the attachments for the building.

The Projects screen displays a grid of the projects for the building.

The Pictures screen displays a grid of the picture information. The pictures may be viewed using the hot-link (the picture will open in a new tab or window) or by selecting the View Gallery button at the top of the grid. The gallery will display each picture in sequence. Clicking in the left half of the picture will scroll backwards; clicking in the right half of the picture will scroll forward; and clicking outside the picture box will close the window. By default, the lowest numbered picture is used for the Building Summary screen. This can be changed by renumbering the pictures or by editing the desired picture and checking the “Use this picture for the building photograph” checkbox.

**Reports**

The Reports screen displays a list of survey reports and options and a Run Report button. The results are displayed in a grid (unless the report is export only) and most of the grids are exportable.

Common Tables

Institution Table
- Institution Uid: numeric
- SBC Id: 3 characters
- THEC Id: 2 characters
- Acronym: 30 characters
- Institution Name: 100 characters
- Physical Address: 100 characters
- Mailing Address: 100 characters
- City Name: 30 characters
- County Name: 30 characters
- State Id: 2 characters
- Zip Code: 10 characters
- Institution Type Uid: numeric
- Notes: 200 characters
- Notes Institution: 200 characters
- Notes TBR: 200 characters
- Coordinator Name: 50 characters
- Coordinator Phone: 20 characters
- Coordinator Email: 50 characters
- Coordinator 2 Name: 50 characters
- Coordinator 2 Phone: 20 characters
- Coordinator 2 Email: 50 characters
- Institution Full Time Equivalent: numeric
- Institution Head Count: numeric
- Display Order: numeric
- Import Status: 16 characters
- Enrollment: 20 characters

Campus Table
- Campus Uid: numeric
- Institution Uid: numeric
- Campus Id: 8 characters
- Campus Name: 100 characters
- Campus Full Time Equivalent: numeric
- Campus Head Count: numeric
- Import Status: 16 characters
### Building Table

- **Building Uid**: numeric
- **Campus Uid**: numeric
- **Building Id**: 8 characters
- **Building Name**: 100 characters
- **Building Short Name**: 25 characters
- **Building Abbr**: 5 characters
- **Physical Address**: 100 characters
- **City Name**: 30 characters
- **County Name**: 30 characters
- **State Id**: 2 characters
- **Zip Code**: 10 characters
- **Gross Area**: numeric
- **Percent In Service**: numeric
- **Last Renovation Year**: numeric
- **Last Renovation Cost**: numeric
- **Last Renovation Area**: numeric
- **Building Use Code Id**: 2 characters
- **Function Primary**: 50 characters
- **Function Secondary**: 50 characters
- **Ownership Type Uid**: numeric
- **Year Built**: numeric
- **Year Occupied**: numeric
- **Replacement Cost**: numeric
- **Contents Value**: numeric
- **Risk Management Id**: 16 characters
- **Construction Type Uid**: 2 characters
- **Comments**: 2000 characters
- **Campus Comments 1**: 200 characters
- **Campus Comments 2**: 200 characters
- **Campus Comments 3**: 200 characters
- **TBR Comments**: 200 characters
- **Schedule D Comments**: 1000 characters
- **Import Status**: 16 characters
## Inventory Tables

### Floor Table
- **Floor Uid**: numeric
- **Building Uid**: numeric
- **Floor Id**: 4 characters
- **Floor Name**: 30 characters
- **Import Status**: 16 characters
